*Uppgradering av fälg och utrustning kan påverka Co2 utsläpp vilket kan påverka fordonsskatten.

Den angivna bränsleförbrukningen och utsläppsvärdena utgår från EU-förordning (EG) 715/2007 i den version som gällde vid tidpunkten för typgodkännande. Värdena avser ett typfordon med grundläggande konfiguration och de visade värdena tar inte hänsyn till storleken på hjul, däck och extrautrustning. Värdena för fordonen här baseras på den nya WLTP-förordningen och översätts därefter till NEDC-ekvivalenta. Observera att från 2020 beräknas fordonsskatter på WLTP körcykeln.

*) Depending on the environmental conditions, a temporary peak of the combustion engine power is provided, which can be approx. 10% above the rated power. The duration of the peak performance increases with falling ambient temperature (approx. 5 s at +25 °C, approx. 40 s at -20 °C).
